

TECHNICAL **CHART 43**

VELATURA MINERALE

Suitable for external uses.

The product can be pigmented.

Description of product

It's a translucent decorative finish based on slaked lime, resins and special additives for the realization of decorative veilings for interior and exterior.

Application Field

Decorative for ancient shadings, veiled effects and prestigious decorations with a matt finish aspect for interior and exterior.

Product characteristics

"VELATURA MINERALE" is a very durable matt veiling, with high water resistance and a good vapor permeability. The careful formulation gives to the product a particular density with thixotropic characteristics that make it very ductile during the application phase. Excellent as finish above lime products as "Travertino", "Calce Barocco", "Intonachino Classico 700" and many others of the line Luxury&Lime. The colour shades can be personalized using the colour scheme of the Tintometric system Luxury&Lime. Thanks to its high breathability and his natural character, with "Velatura Minerale" we can create very particular aesthetic effects characterized by typical ancient-shading effect, distinctive of ancient lime-based products.

Technical data	
Name	Velatura Minerale
Composition	Micronized slaked lime and resins in aqueous solution.
Aspect	Thick Liquid
Color	Opalescent white
Dilution	in water 15 - 25%
Quantity per layer	ca. 5-7 m ² /Lt
PH	13
Vapour permeability	SD ~ 0,01 m (DIN 52 615)
Water absorption	w ~ 0,5 Kg / (m ² h0,5) (EN 1062-3:2001)
VOC class	VOC 0 g/l, wall paint and subcategory "L" max.value UE2010 30g/l
Specific weight	1,15 Kg/lit
Packaging	Buckets 1 - 5 - 15 Lt
Storage	Keep in dry place with temperture min.5° - 30°C max.
Notice	Protect the surfaces from rain in the first 24 - 48 hours from application

VELATURA MINERALE

Instructions for use

- Application with brush, sponge or decorative glove
- Application of 1 or more coatings according to finishing needs
- Base must be clean and dry, any unsubstantial parts, traces of oil or grease must be removed; plaster any irregularity of the base

We suggest to apply "Velatura Minerale" on solid and steady surfaces

- "Velatura Minerale" is ready to use, easily colorable and can be diluted according to various decorative needs.

For outside decorations it is recommended to use only specific dyes, highly stable and UV resistant

The product may be spreaded using various tools as pad, roller, cloth etc. to obtain the desired decoration

- Temperature of application 5° to 35°C. Avoid application in case of forthcoming rain or windy days. Protect external decorations for at least 48 hours from pouring rain

Notes

The present technical chart has been written by Bericalce's experts and the indicated technical and scientific information have been tested in our own workshop.

Any responsibility regarding the results are due only to the method and conditions used during application of the product.

These indications are a valid support for testing the quality of the product in each specific case.
